# Rocket Science: 50 Flying, Floating, Flipping, Spinning Gadgets Kids Create Themselves

## Synopsis

Blast off into the wacky world of gadgets! Have you ever wondered what makes airplanes fly, how boats float, or why your doorbell works? \* Would you like to build your own flying, floating, diving, spinning, howling, scooting objects? \* Are you looking for a terrific science project that moves? If you answered "Yes!" to any of these questions, then Rocket Science is for you. It shows you the science behind how things work by teaching you how to build a rocket boat, kaleidoscope, mousetrap car, stethoscope, compass, fruit-powered battery, and lots of other wonderful gizmos. All of the projects are safe and easy to make out of stuff you can find around your house. This amazing book covers a wide variety of science topics, including mechanics, air power, water power, electricity, magnetism, chemistry, acoustics, and optics.

## Customer Reviews

The book is well organized, with experiments and explanations that are simple enough to work with one or thirty kids (I teach 5th grade). This is a great, fun supplement to any curriculum you may already have.

I expected the projects to be a little more extravagant. But I forgot that it doesn't take much to fascinate children.

good condition.
