## **Customer Reviews**

I have used Craftsman Books for decades to improve my business practices. The National Renovation and Insurance Repair Estimator will assist you in preparing a detailed estimate which is

required for insurance repair work.

It seems a little bit off on some things and the categories don't always match up with what you are doing. Like if you are trying to tile a 100 sq ft 10 x 10 room it might be low. It is a good starting point though to help with bids. Experience from past jobs is the best way to bid things, but if its something you haven't done a lot of, this book will help.

It's not always easy to find renovation estimates that are accurate to actual costs. Some appraisers use Marshall & Swift, but for my money I found the 2006 National Renovation & Insurance Repair Estimator the most accurate to the real costs of renovation and insurance repair. It has an amazing amount of items listed and gives the labor and material replacement cost.

Doesn't come with CD, you have to use a code and download/install software which was a problem since I wanted to use this on a work computer and the company firewall wouldn't let me install.

**MISSING ITEMS CD, ESTIMATOR CD MISSING DELIVER AS ORDERED AND PAID FOR WILL REMOVE NEGATIVE REMARK ON RECEIPT OF CD**

I prefer the old CD instead of the on line version since I have such a slow DSL (Thank you Century Stink)

been using this estimator for 16 years in my business...it is the best resource.
