Customer Reviews

The 6th edition has better structure in quant and substantial improvements in Verbal. See my comparison vs. 5th edition below. If you are just starting out with GMAT prep - get this bundle; it's a good deal for the Manhattan GMAT Guides (separately they cost close to \$150). These books don't emphasize tricks or easy ways to 700+ score, instead they methodically cover areas tested, and should be pretty much all you will need (besides the Official Guides - see below for links). If this is above your budget or you are in a rush, then would recommend you pick the best of the pack:- The GMAT Roadmap Great collection of wisdom (see my review of this book)- Number Properties Guide (condensed overview of Arithmetic and strategies for saving time/solving questions more effectively)- Word Problems Guide (includes some of the hardest topics - probability, combinations, and statistics)- Sentence Correction (the best book out there on SC)- Critical Reasoning (only second to PowerScore CR but by a slim margin)- Reading Comprehension - a significantly revised book (there are no other dedicated RC books on market really) Between these 5 books you should have 80-90% of the GMAT covered and the rest could be picked up from the remaining books and practice with the Official Guides. You can throw in a Kaplan Premier as well - a good intro to GMAT book with 6 free GMAT Tests. It is a good starter book to get your feet wet, but definitely not a must. To make the most use out of the MGMAT guides, you will need the Official Guide 20015 and also OG Verbal 2nd and OG Quant 2nd editions are recommended. The guides refer to these 3 books for additional practice questions. If you own previous versions of the Official Guide books, you can use those too with a translation table available from MGMAT's website.*** Each book comes with access to 6 online gmat tests and additional question banks. Don't spend money on these as they are pricey (\$40 for 6 tests on the MGMAT website). Also, if you are new to the GMAT, download 2 official practice tests from GMAC and take one of them before you start prepping to get your level - very helpful to track your progress along the way but don't waste these tests - they use real retired gmat questions and though it is possible to recycle them (there are close to 900 questions in the banks), would recommend you use something less valuable for your practice such as MGMAT tests included with these books). One more thing, don't rush into questions and tests -

you will only hurt your self confidence, instead methodically cover each math and verbal topic and only after you are done with each of the sections move on to take the tests (take math only after you are done with math and verbal only after done with verbal). Final word of advice - the main mistake (esp in verbal) is not following strategies. Whichever books or strategies you use (they are all pretty similar between MGMAT, PowerScore, and Kaplan) - follow them EXACTLY. These people are getting big bucks to develop methods to improve score and maximize performance - don't try to be smarter and change things around. Unless you are scoring 750+, I would follow each step of the strategy to the "T". If the book says to read the CR question twice, then that's what you do even though it may seem that it is faster to read it once - trust me, there is a reason why you read it twice. If you want to get 700+ and not worry about the GMAT, stick to the strategies and keep creativity low.~~~ Comparison of the 5th edition vs 6th edition. ~~~I have gone through all of the books and here is how it looks:Overall, all books have undergone some degree of updating; not just slapping a new cover as some providers do, so you will be better off buying the 6th if you are deciding. If you own the 5th edition already, I would recommend getting only the IR and RC books, however as they have undergone the most transformation. The rest is organized better (more logical); it will help those who are short on time; the pages now also have more graphs, charts, and cheat sheets at the end (a number of books added this feature including Geometry and CR).IR - substantial changes and improvements - the book needed them, and is now split by question type and organized a lot betterQuant - mostly minor updates (less than 10% new content)RC - Major updateSC - Restructure with the main difference is that the idiom section is cut down and rewrite of most chapters (more than 20% of content updated)CR - Improvements in text-heavy areas that put people to sleep before. Cheat sheets added after each chapter. I do like pre-thinking, however, in CR, so I still feel that CR book can be improved.Hopefully this will get you started. I bought these books to prepare for the GMAT - I haven't taken a standardized test in years! My first practice test put me at a 650 so I know I had work to do. I poured over these books and studied four hours a night after work and every weekend for two months. The combination of these books, the GMAT Original Guide Bundle (buy those for practice problems), and hours of studying produced a 760 GMAT score!!! Highly recommend for time-saving tricks, comprehensive review materials and common-sense explanations.

Great set of guides. I hate standardized tests but I decided to give self studying a try. My first practice test before I started studying I got a 490. I went through all of these books and the OG guide in 3-4 months. After that I was scoring around 580s on practice tests. I took my official test in October 2015 and got a 640. Buy these along with a solid study plan and it can be a great alternative to hiring an expensive tutor.

Here is what you need to know:1. GO download an online syllabus to follow these books.2. Do your homework and stay on top of reading all the subjects3. DO not go in order, mix it up as much as you can4. The books do a great job of teaching strategies and subject material5. Books are easy to read and entertaining

Quick disclaimer, I am returning to school professional (almost 10 years from college and 15+ from standardized testing). Purchased the set or studying for the GMAT to attend business school in the fall. Was on a little bit of a time crunch with work and life. The test books are very comprehensive. The best is the 1st book that explains the GMAT. The other books are broken down into different sections of the test. The math sections give you critical tips and tricks to break down the problems, remember your taking this test without the use of modern inventions like calculators or smartphones. The booklets come with access to more tests and the ability to practice online with the tests that are set up just like the actual test. I liked that ability to take the tests online and take the ability to stop the test and resume in case life gets in the way of taking the practice exam. The 5th star would be there if there was more access to the online features. Remember that your buying a test prep course's books. You won't be getting access to everything on the website or access to the classes that they have if you take a MP class. Also pretty sure that their grading scale gives you a worst case scenario, a lot of the reviews show you how the test is adaptive and makes a huge difference to how the scores. My test scores on the MP website were showing me almost 150 points less than what I got on the GMAT when I took it. My opinion, Manhattan Prep teaches you to take the test, less about the actual learning that would help long term for students with more time. I would buy the first book that explains the GMAT and then buy a practice test book to keep you going. The classes that were accessible for a trial seemed to teach more ways to guess and accomplish the test by if your going to spend the time and take a test prep course, then grab this test set. On a side note a friend of mine bought only the Math section books to strengthen that section and it worked well for him, just an idea for those out there.

Manhattan GMAT got me a 730 on my first time taking the GMAT with under 2 months of studying. I know this sounds like an infomercial or something but seriously, I strictly used these 10 guides and the online CAT exams they provide. Would recommend to anyone looking to do well on the GMAT.
