The two "500+ Essential-to-Know Aquarium Species Books" are the biggest bang-for-your-buck aquarium stocking and general information books out there. Even though both of the books, *Marine Fishes* (ISBN: 1890087386 by Scott W. Michael) & *Marine Invertebrates* (ISBN: 1890087661 by Ronald Shimek) are pocket guides, they offer so much more information than the other books that I have seen. They don't waste space telling you about fish that you will never see in an aquarium and instead give relatively in-depth information on the species that you are likely to encounter. Neither do they present the information in hard-to-decode picture format; they use sentences: A very underused communicated technique in most aquarium handbooks out there. Not only is the selection of species perfect but the provided information on care is perfect as well.
