Customer Reviews

The wash away applique sheets are a little thick, so if you leave them in and want to hand quilt, you will be an unhappy camper. Also, because of the fusible, even if you try to wash them away before assembling your quilt, some of the fusible residue will remain in your quilt (at least it did in my quilts).

This is as advertised. It's an iron on stabilizer that can be printed. I use it for student patterns for class. It does not completely dissolve, but it does soften a great deal. If you're printing with an ink jet printer it's great. I would be careful for any printer that involves a heat process because I think it would fuse to your printer head.

This product does it ALL! Printable, Water Soluble, Single Sided, Fusible and Eco-Friendly. There just aren't enough words to describe these wonderful sheets. I just love them and will buy again and

again.

I am somewhat frustrated with the negative reviews when it is obvious this product was not used for the purpose it was intended. This product is NOT meant to be removed. This product is not meant to be used for the applique technique where the back fabric is cut away underneath the applique. This product is meant to stay inside the english paper piecing or applique with the back fabric left intact. Most of it dissolves in first washing and becomes quite soft. There are so many ways to do applique and we need to make sure we get the right tools for our unique method. I love this paper for so many reasons. I found it easier then using freezer paper for prepared edge and used less glue pen. Saves money on glue. This paper gives the applique a bit more stability and as one reviewer stated it makes fussy cutting much easier. I am using this product on my granddaughters quilt which has tons of appliqued leaves.

Good product for backing hand or turned edge machine applique. Stabilizes appliques, gives them a little loft and keeps appliques smooth. Makes edges crisp and helps keep points sharp. Love this stuff. Like that it's fusible on one side.

I use the heck out of this stuff. Irons on, sewing needles go right through it, easy to cut, just love it. I am using this instead of cardboard hexagons right now to make a Grandmothers Flower Garden quilt. I tried both ways and this stabilizer is the best. I think they charge way too much for S&H though! Thumbs down on that.

I would really like to love this product. But I really DON'T. The product was described as a wash away, printable quilting paper. It was printable, but not wash away. I ironed it like the instructions. Left a large amount of residue after several machine washings. Then I tried to use temporary spray adhesive and not iron. Still residue after machine washing. I would be glad to give this product 5stars if someone can tell me how to save the quilt that has this mess all over it.

I was not impressed by these applique sheets. I actually found them difficult to lift off without having to wash them away. Even tho they wash away, if I need to move them, or ironed in the wrong place, it's difficult to lift and reposition them. The other gripe I have with these is that if you want to use them on a cutting mat to print or cut out the shapes on, you don't want to mistakenly put the paper on the mat first. Cleaning it off your mat will be a nightmare.
