Only one word describes the catalog set.....INCREDIBLE. As a life-long baseball fan, collector, dealer, etc, this set of catalogs, pictures in beautiful crystal clear color, many of the artifacts of America's National Pasttime. Many people were upset at Halper for breaking this collection up. Contrary to that opinion, I believe breaking the collection up allowed SO many people to share in the history of the game. Five million dollars worth of collectibles were purchased by MLB for the National Baseball Hall of Fame. Twenty two million dollars worth were auction in the Sotheby's auction and an unknown amount on .sothebys.com. These catalogs contain relics from every facet of the game.....baseball cards dating back to the 1880's.....team and individual photos dating back even farther.....uniforms, bats, balls, gloves from nearly every hall of famer.....personal trophies like triple crown, Cy Young, MVP and so much more. Nowhere will you find such a book that illustrates why Baseball is woven through the fabric of America than this catalog. The lot descriptions are carefully crafted to be both a history lesson and a thought (and pocketbook) provoking snapshot of baseball. Never again will there be such a collection amassed. No one has the access to players

and probably the funds to acquire such a collection....you get a glimpse at everything important about baseball. Everything good about baseball.....you forget about the strike of 1994, you forget about the high paid cry babies of today and remember the guys that played the game for one reason.....the love of the game. There was team loyalty, work ethics, and so much more that baseball and America as a whole is sometimes seriously lacking today. Spend the bucks.....you won't regret it.....

I have had this book collection for years. I bought it at Costco about 8 to 10 years ago. It is truly amazing to see everything this man had collected. Unfortunately it is now come to light that most of it is fake. He made it up, stole it, or paid people to lie about it for him. Turns out he was the Barry Madoff of Sports Collectables. He even fooled the MLB Hall of Fame (they ended up returning most of the 7 million dollars worth of bogus stuff they bought) and Billy Crystal paid over \$230,000 for a bogus Mantle glove. Sad.

Barry Halper and I became friends as the result of being two of four roommates in a physical rehabilitation facility in West Orange, NJ, he being there for treatment due to cardiac and diabetic complications, I as the result of an auto accident. Barry could have afforded his own wing in the place but he wasn't the sort of entitled twit one encounters so often these days (Christopher Reeve, another quondam resident, I'll offer as an example of the latter). Anyway, had it not been for the visit of a friend who knew of Barry's collection, privately apprising me of same, I rather doubt I'd ever have heard it from him. What I did learn during many late night conversations when pain prevented sleep was that his love of the game of baseball exceeded even my own. He was a humble man prompted by an abiding enthusiasm, and I think it's a damn shame that a lying sack of s\*\*\* like Peter Nash took advantage of his demise to make all sorts of base and baseless accusations (no baseball humor intended, the subject being anything but humorous), intended to throw suspicion from his own nefarious activities, which had to be addressed and countered by others after Barry's passing. Buy this set of books, which, aside from being a sumptuous photographic feast of baseball memorabilia, is more affordable than when originally issued. If you're interested in historical baseball you really can't afford not to treat yourself to this magnificent collection, the life's work of an unassuming man whose character has been besmirched by a ne'er-do-well (and ain't that the way of the world?).

This is the Hall of Fame of baseball memorabilia, without equal. Halper had put together a collection

of almost every baseball-related item that could be collected, and these catalogues display most of that collection, including lots of items that you never would have thought even existed. The pictures of the items are terrific, and are worth the price just by themselves. But in addition, this post-auction printing also includes the final bid prices for items in the auction, so it serves as an excellent "price guide" for rare and unusual material - memorabilia you certainly won't find in Beckett's guides or other more generic price references. And, for those of us that think of some of the final bid amounts in terms of hefty mortgages rather than hobby expenses (e.g., \$305,000 for a Lou Gehrig jersey!) the book is great fodder for dreams, however unattainable they may be...
