Customer Reviews

I am not a perfectionist when it comes to quilting; it's supposed to be a hobby, after all. But I do subscribe to the belief that a quilt is more than piecework held together by quilt-in-the-ditch. In my view the quilting should be the voice harmonizing with the melody "played" by the piecework. Unfortunately I have neither the talent to do in-depth machine quilting like Harriet Hargrave (see *Heirloom Machine Quilting: A Comprehensive Guide to Hand-Quilting Effects Using Your Sewing Machine*) nor the equipment and vision of someone like Karen McTavish (whose books on *Mastering the Art of McTavishing* make me swoon). Even when I'm pleased-as-punch with my quilt top, my ability to see "hmmm what should I quilt here" is limited. Even when I do, my skill at marking a quilt can most charitably be described as "kind of sucks." Fortunately, now I have

Angela Walters's Shape by Shape to guide me. The premise with this book of 70 free-motion designs is that you choose a geometric shape (triangle, rectangle, circle), and then pick designs that fit in them. You don't have to mark anything, or if you do it'd be to put a dot 1" inside the sewing line. Certainly you don't have to figure out how to draw reliably on fabric, or go through reams of expensive quilting tracing paper. Everything has step-by-step instructions and diagrams that honestly are easy to follow.
